## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-9 and 19-30, drawn to a subject matter of multi-processor configuration in n-dimensional arrangement, classified in class 712, subclass 10.
  - II. Claims 10-14, drawn to an apparatus having an expansion interface and a plurality of image signal processors having a plurality of ports that couple the plurality of image signal processors together in a point-to-point configuration and a hardware accelerators included in at least one of the plurality of image signal processors, classified in class 382, subclass 303.
  - II. Claims 15-18, drawn to a system having a CCD sensor to capture an image, an image processor for process the image captured by CCD sensor, and a memory for storing image processed, classified in class 382, subclass 312.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in single combination. The subcombinations are distinct from each other if they are shown to separately usable. In this case, invention II has separate utility such as a number of ports and an expansion interface. Such a utility is not utilized in invention I. See M.P.E.P. §806.05(d).

Inventions I and III are related as subcombinations disclosed as usable together in single combination. The subcombinations are distinct from each other if they are shown to separately usable. In this case, invention III has separate utility such as a CCD sensor. Such a utility is not utilized in invention I. See M.P.E.P. §806.05(d).

Art Unit: 2624

Inventions II and III are related as subcombinations disclosed as usable together in single combination. The subcombinations are distinct from each other if they are shown to separately usable. In this case, invention III has separate utility such as a CCD sensor. Such a utility is not utilized in invention II. See M.P.E.P. §806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

#### ***Specification***

3. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

#### ***Conclusion***
